Armored RNA Quant® SARS-CoV-2 SV2

In response to COVID-19, Asuragen has developed molecular diagnostic controls for multiple regions of the SARS-CoV-2 genome, including mutations in the spike protein prevalent in the Alpha (B.1.1.7), Beta (B.1.351), Gamma (B.1.1.28), Delta (B.1.617.2) and Omicron (B.1.1.529) strains. Armored RNA Quant® controls allow for stable, reliable and safe ways to rapidly test for the presence of SARS-CoV-2 and its variants.
